LITTLE RIVER WASTE WATER TREATMENT FACILITY UPGRADE PROJECT

Project

Benefits

The primary benefit of this work will be the replacement and upgrade of outdated equipment and structures with the latest technology in waste water treatment. Another benefit will be the installation of an odor control system. Treatment capacity will increase from 1MGD to 2.6 MGD.

Fact Sheet - S124

What is the Little River Waste Water Treatment Facility Upgrade Project?

The Little River Waste Water Treatment Facility was built in 1978 and is located at 2415 Cox Road, Woodstock, Georgia 30188. The plant serves the Mountain Park area and nearby communities in North Fulton and parts of Cherokee County. The plant property is located at the confluence of Rocky Creek and Little River adjacent to the Settindown Golf Course. The Project involves the removal and replacement of all outdated equipment with the latest innovative equipment in waste water treatment, the removal of all unused buildings and structures, The installation of a membrane filtration system, the installation of an odor control system and to increase the plant treatment capacity from 1 million gallons per day to 2.6 million gallons per day.

How will the surrounding community be impacted?

The project is anticipated to have minimal impact on the surrounding community and the adjacent creek. The primary impacts will be some construction noise and clearing of materials, additional construction traffic, delivery of equipment and supplies and removal of debris from the site.

Current Status: The project is currently being designed by Brown and Caldwell Engineering Company. The design is approximately 30% complete at this time. A Public Meeting has been scheduled to be held at the Settindown Creek Club House, 5500 Settindown Dr., Roswell, Georgia 30075 on October 10, 2012 at 6:30 pm. The purpose of the meeting will be to inform the public of the need for the improvements, to comply with State Water Control rules and regulations and to allow the public to review Environmental Documents and ask questions about the project.

Schedules

The Design Phase should be completed by May 2013.

Construction is scheduled to begin following the project bidding phase and contract award and execution by the Fulton County Board of Commissioners.
